PLAYBOOK-FLOOD-001	Flood Response and Local Team Readiness	["flood", "rainfall", "river", "drainage", "water", "road cl	For verified flood risk, inspect drainage hotspots, verify flood equipment readiness, coordinate approved diversions, and prepare a local-team readiness alert. Public notifications and deployment require incident-command approval.
PLAYBOOK-WINTER-002	Winter Route Resilience	["snow", "ice", "blizzard", "winter", "visibility", "road"]	For heavy snow, low visibility, or icy roads, stage snow-clearing capability on priority routes, assess transport restrictions, and communicate travel risk through approved channels.
PLAYBOOK-HEAT-003	Heat Health and Workforce Protection	["heat", "temperature", "cooling", "hydration", "outdoo	For extreme heat, prepare cooling-center readiness, coordinate welfare checks for vulnerable residents, and review hydration and work-rest controls for outdoor teams.
PLAYBOOK-COMMS-004	Incident Communications Approval Standard	["alert", "communication", "approval", "incident", "local	Draft alerts must identify the verified event, affected area, required readiness action, and approval status. Do not send external notifications until the incident commander has approved the action.
PLAYBOOK-DATA-005	Operational Data Quality Standard	["source", "confidence", "timestamp", "freshness", "loca	Operational decisions require a traceable source, timestamp, confidence indicator, and geographic context. Hold incomplete, stale, or low-confidence observations for data-quality review.
